

Cloud Engineer with 9 years of IT experience and a strong focus on **AWS** cloud solutions. AWS Certified Solutions Architect – Associate with hands-on expertise designing and implementing scalable, resilient, and cost-effective architectures, enabling application modernization through automation, serverless services, and cloud-native patterns. Interested in advancing toward cloud architecture roles while leveraging emerging AI technologies to solve business challenges.

Work Experience

TCS

May 2023 – present

DevOps Engineerremote

- Implemented **CI/CD pipelines** for application components using **Bitbucket** (Git version control), **Jenkins** orchestration, and **RLM** Deployment Manager.
- Performed troubleshooting and analytical problem-solving during **Non-Production** and **Production onboarding** activities.
- Resolved **code integration** and **deployment incidents**, ensuring stable release operations.

Production Support Engineer

Feb 2021 – Apr 2023

remote

- Collaborated with multidisciplinary teams (API, Middleware, Legacy Backend Systems, and L3 Telephony) to **troubleshoot** and resolve production incidents through **log analysis**, documentation review and active participation in **technical sessions**.
- Performed daily production application **monitoring activities** to proactively identify and mitigate potential issues, ensuring platform stability and service continuity.

AXA Seguros México

May 2018 – Apr 2019

IT Project ManagerMexico City

- Led a technical project tied to a key enterprise platform, managing budget, resources while driving strategic decisions and reporting to PMO and CIO.

Achievements: annual **BAU cost savings** through server efficiency initiatives, **software** component **decoupling**, platform and DB upgrades, **HA** infrastructure **optimization**, cloud migration assessment, and collaboration with international consultants to implement industry best practices.

IT Analyst (Graduate Program)

Mar 2016 – Apr 2018

Mexico City

- Built cross-functional expertise spanning multiple technology domains — including **Software Development** (built a **Javascript front-end** web application using a **RDBMS** platform at the **back-end**), **Business Analysis**, **IT Architecture**, **Business Relationship Management**, and Project Management — through end-to-end ownership of real-world project deliverables.

Education

Tecnológico de Monterrey

2009 – 2015

B.S. Electronic and Computer EngineeringPuebla, Mexico

Projects

Designed, implemented, and troubleshoot multiple AWS-based solutions covering **cloud engineering**, **solutions architecture**, **DevOps**, **data processing**, and **Generative AI** use cases. Experience includes designing scalable, resilient, and cost-efficient architectures, leveraging serverless and event-driven patterns, CI/CD automation, containerized workloads, data ingestion and analytics pipelines, intelligent document processing, cloud-native integrations, and platform modernization using services including **S3**, **Lambda**, **API Gateway**, **DynamoDB**, **SQS**, **EventBridge**, **ECS**, **ECR**, **RDS**, **CodePipeline**, **CodeDeploy**, **Glue**, **QuickSight**, **Textract**, **IAM**, **CloudWatch**, Amazon **Bedrock**, and external AI APIs.

Technical Skills

JavaScript, Python, HTML, Git, Jenkins, Docker, Terraform, Kubernetes, Ansible, Linux (CLI, Bash, Log Analysis, Troubleshooting), GitHub, GCP, Jira

Languages

French (C1), English (C1), Arabic (A2), Spanish (native)
